Jovie Admin Dashboard: User Manual

Version: Phase 11.6, 12 November 2026
For: everyone who works in the Jovie admin dashboard (`/admin`)
Arabic version: admin-dashboard-manual.ar.md

This manual explains each section of the dashboard, what each role can do, and how to handle everyday work such as orders, stock and messages. It describes the dashboard as it is built today. Where something is not built yet, it says so.

> **About the screenshots.** The places marked **[Screenshot S-xx]** are reserved for screenshots. Section 17 lists every screen to capture. Use test data only, never real customer details.

Contents

1. Signing in and your account
2. Finding your way around
3. Roles and permissions
4. Overview
5. Products
6. Inventory
7. Discounts and promo codes
8. Orders
9. Sales and reports
10. Contact messages
11. Reviews
12. Customers
13. Shipping and store settings
14. Corporate website
15. Admin users (super admins only)
16. Audit log and notifications
17. Screens to capture
18. Messages you may see and what to do

---

1. Signing in and your account

- Open `/admin/login` and sign in with your work email and password.
- Accounts are created only by a **super admin**. There is no self sign-up.
- After **5 failed attempts in one minute**, sign-in is paused briefly. Wait a minute and try again.
- **Forgot your password?** Choose **Forgot your password?** on the sign-in page. The reset link is valid for **60 minutes**. You can ask for at most 3 links a minute.
- A new password must have **at least 12 characters, with upper-case and lower-case letters and a number**.

- Your session ends after a period of inactivity. You are then sent back to the sign-in page; sign in again and continue.
- If a super admin **deactivates** your account, you are signed out at once.

> **Important: email is not delivered in this environment.** The server writes emails to its log instead of sending them. Until a real mail service is set up, **password-reset and invitation emails do not reach anyone.** See section 15.3.

[Screenshot S-01] Sign-in page.

2. Finding your way around

- The **left menu** shows only the sections your role can use. On a phone, open it with the menu button.
- **Language:** switch between English and Arabic at any time. Arabic pages read right to left.
- **Times** are shown in **Egypt (Cairo) time**. **Money** is in Egyptian pounds (EGP).
- If you open a page your role cannot use, you see the page **"You do not have access to this section"**.
- **Two people editing at once:** if someone else (or the system) changed a record after you opened it, your change is **not saved**. The page tells you so and shows the current version. Check it and try again.
- Every important action asks for **confirmation** first. Actions that cannot be undone say so in the confirmation.

[Screenshot S-02] The dashboard with the left menu (English) · **[Screenshot S-03]** The same in Arabic.

3. Roles and permissions

Each admin has exactly **one role**, and the role decides what they can see and do. Roles and their permissions are fixed in the system; they cannot be edited from the dashboard.

3.1 The roles

Role	Arabic name	Typical person	Sections
Super admin	مدير عام	Owner / IT lead	Everything, including admin users and the audit log
Store manager	مدير المتجر	Runs the online store	Products, discounts, inventory, orders, payments and reports, customers, shipping, reviews
Product manager	مدير المنتجات	Looks after the catalogue	Products, discounts, inventory, reviews
Order manager	مدير الطلبات	Handles orders and delivery	Orders (including the Excel export and recording cash on delivery), customers
Content manager	مدير المحتوى	Corporate website and customer contact	Corporate website, contact messages, reviews
Content editor	محرر محتوى	Edits website texts	Corporate website, reading contact messages, reviews
Support	الدعم	Answers customers	Contact messages, viewing orders and customers

Changed in Phase 11.6 (approved): the content manager also has `content.manage`, so it can manage the corporate website. No other role changed.

3.2 Permission matrix

✅ = allowed · — = not allowed

Permission	What it allows	Super admin	Store manager	Product manager	Order manager	Content manager	Content editor	Support
`admins.manage`	Admin users, audit log	✅	—	—	—	—	—	—
`settings.manage`	Store settings (checkout switches and amounts)	✅	—	—	—	—	—	—
`content.manage`	Corporate website: brands, services, company information, page content, image upload	✅	—	—	—	✅	✅	—
`messages.view`	Read contact messages	✅	—	—	—	✅	✅	✅
`messages.manage`	Change a message's status	✅	—	—	—	✅	—	✅
`catalog.manage`	Products, product discounts, promo codes	✅	✅	✅	—	—	—	—
`inventory.manage`	Stock, stock history, low-stock levels	✅	✅	✅	—	—	—	—
`orders.view`	See orders	✅	✅	—	✅	—	—	✅
`orders.manage`	Change order stages, internal note	✅	✅	—	✅	—	—	—
`orders.export`	Export the orders list to Excel (with `orders.view`)	✅	✅	—	✅	—	—	—
`payments.manage`	Payment details, reports and report exports, record cash	✅	✅	—	—	—	—	—

Permission	What it allows	Super admin	Store manager	Product manager	Order manager	Content manager	Content editor	Support
`payments.record_cod`	Record cash on delivery **only**	✅	—	—	✅	—	—	—
`customers.view`	See customers (view only)	✅	✅	—	✅	—	—	✅
`shipping.manage`	Shipping fees and delivery per governorate	✅	✅	—	—	—	—	—
`reviews.manage`	Approve, hide or reject reviews	✅	✅	✅	—	✅	✅	—

Some actions need two permissions:

Action	Needs	Who can
Export the orders list to Excel	`orders.view` + `orders.export`	Super admin, store manager, order manager
Sales and reports (and their exports)	`orders.view` + `payments.manage`	Super admin, store manager
Inventory report	`orders.view` + `payments.manage` + `inventory.manage`	Super admin, store manager
Put returned goods back in stock	`orders.manage` + `inventory.manage`	Super admin, store manager
Record cash on delivery as collected	`payments.manage` **or** `payments.record_cod`	Super admin, store manager, order manager

3.3 Safety rules for accounts

- At least **one active super admin** must always remain.
- **Nobody can change their own role**, not even a super admin.
- A deactivated admin is **signed out immediately**. Their account and history are kept and they can be reactivated.

4. Overview

The first page after sign-in (`/admin`), available to every role. It shows the key figures and shortcuts that your role can use. Figures you are not allowed to see are not shown.

[Screenshot S-04] Overview (store manager).

5. Products

Who: super admin, store manager, product manager. · `/admin/products`

- The products of the Jovie store. **Each product has exactly one size**, with its own SKU, price (EGP) and stock.
- **Add** a product with **Add product**; open a product to edit its names (English and Arabic), descriptions, images, price and SKU.
- **Images:** upload, reorder and choose the main image.
- **Removing a product** hides it from the store; it can be **restored**. Past orders keep their own copy of the name and price, so they never change.
- A price change that would make an existing fixed discount invalid is refused, with an explanation.

[Screenshot S-05] Products list · **[Screenshot S-06]** Product form.

6. Inventory

Who: super admin, store manager, product manager. · `/admin/inventory`

- Shows the stock of each product, with **In stock / Low stock / Out of stock**.
- **Adjust stock:** choose a reason and the quantity:

Reason	When to use	Note
New shipment	Goods arrived	Optional (for example the invoice number)
Stock count	After counting the shelf	Required
Correction	Fixing a mistake	Required
Damaged or missing	Write-off	Required

- Orders change stock automatically: **Reserved by an order** when an order is placed, **Released** when it is cancelled or expires, **Returned to stock** after a return is checked.
- **Low-stock level:** set per product. The product shows as "low stock" when its stock is above 0 and at or below this number. This does not change the stock.
- **Stock history** (`/admin/inventory/movements`): every change, newest first. History **cannot be edited**: a mistake is corrected with a new adjustment.
- Admins who manage inventory get a **notification** when a product becomes low or out of stock.

[Screenshot S-07] Inventory list · **[Screenshot S-08]** Stock adjustment dialog · **[Screenshot S-09]** Stock history.

7. Discounts and promo codes

Who: super admin, store manager, product manager. · `/admin/discounts`

7.1 Product discounts

- Lowers what customers pay for one product. The **regular price stays as it is**; the store shows it crossed out.
- Type: **percentage (1–99%)** or **fixed amount** (below the price). It can be switched on or off, with optional start and end dates (Cairo time).
- A product cannot have its own discount and a "compare at" price at the same time.

7.2 Promo codes

- Codes customers type in the cart. Code: 3–32 characters (letters, numbers, `-`, `_`), not case-sensitive.
- Settings: percentage or fixed amount, minimum order, start/end dates, **total uses** and **uses per customer**, internal note.
- New codes start **off**. Codes are **never deleted**; switch them off instead.
- A promo code applies **only to products without their own discount**. Only one code per order.
- Uses are counted from orders; **cancelled and expired orders do not count**.

Example: `WELCOME10`, 10%, minimum order EGP 500, 100 uses in total, 1 per customer, valid all of December.

[Screenshot S-10] Product discounts · **[Screenshot S-11]** Promo codes list · **[Screenshot S-12]** Promo code form.

8. Orders

Who: view: super admin, store manager, order manager, support. Change: super admin, store manager, order manager. · `/admin/orders`

8.1 Two separate statuses

Every order has **two independent statuses**:

1. **Fulfillment stage**: where the order is in the work (New → Delivered).
2. **Payment status**: **Paid** or **Not paid**.

Changing the stage never changes the payment status. For example, marking a cash-on-delivery order as Delivered does **not** mark it as paid: the cash is recorded separately (8.6).

8.2 The stages

Stage	Arabic	Meaning
New	طلب جديد	A cash-on-delivery order was placed and waits for confirmation.
New – awaiting card payment	طلب جديد – بانتظار الدفع بالبطاقة	A card order waits for its online payment. It becomes **Confirmed automatically** when the payment provider confirms the payment.
Confirmed	تم التأكيد	The order is accepted.
Preparing	جاري التحضير	The order is being packed.
Prepared	تم التحضير	Packed and ready for delivery.
Delivered	تم التسليم	The customer received it.
Cancelled	ملغي	Cancelled; reserved stock went back to inventory. **Final.**
Returned	مرتجع	Came back (refused at the door or returned after delivery). **Final.**
Expired	منتهٍ	A card order not paid in time; set by the system. **Final.**

Customers see the same stage names in their account.

8.3 Moving an order

On the order page, the **Actions** panel shows only what is allowed now, for your role.

Normal next step (buttons, no note needed):
New → **Confirm order** → **Start preparing** → **Mark as prepared** → **Mark as delivered**.

Cancel order: possible from any stage **before Delivered**. A **reason is required**. The reserved stock goes back to inventory (once).

Mark as returned: possible from **Prepared** or **Delivered**. From Delivered, a note is required. The goods do **not** go back to stock automatically: check them first, then use **Put returned goods back in stock** (super admin and store manager; once per order).

Correct the stage (manual fixes and exceptions): under the buttons, **Correct the stage** lets you move the order to **any other working stage**, forward or back (for example from Delivered back to Preparing when the courier brings it back, or straight from New to Delivered for a hand-delivered order).

- **A note is required** for every correction. The confirmation shows "from" and "to" before anything changes.
- Moving **back** clears the dates of the later stages.
- The payment status does **not** change.

Rules the system always keeps:

- Cancelled, Returned and Expired are **final**; they cannot be reopened.
- A **delivered** order cannot be cancelled (use Returned).
- A **card order cannot be confirmed by hand before it is paid**, and a **paid card order cannot be cancelled** in the dashboard (refunds are not built yet).
- Card orders have no "New" stage to go back to.
- If someone else changed the order meanwhile, nothing is changed; the page reloads with the current state.

[Screenshot S-13] Order page: actions panel · **[Screenshot S-14]** Correct-the-stage picker · **[Screenshot S-15]** Correction confirmation with the required note.

8.4 Timeline and audit

- The **Timeline** on the order page lists every change: **from which stage to which stage**, **date and time**, **who** (admin name, customer, system or payment provider) and the **note**.
- Lines marked **internal** are never shown to the customer. Customers never see admin names or notes.
- Every stage change is also written to the **audit log** (section 16): "Order status changed", "Order cancelled" or "Order stage corrected (with a note)".
- The order header shows the stage and payment badges and **"Stage since …"** (when the stage last changed).

[Screenshot S-16] Timeline with a correction and its note.

8.5 Finding orders (list and filters)

The orders list shows, for each order: number, customer and phone, date placed, items, total, **payment method and payment badge**, **stage badge with "Stage since …"**, governorate and last update.

Filters (they can be combined):

Filter	Notes
Search	Order number, customer name or phone
Order status	Any stage
Payment status	Paid / Not paid
Payment method	Cash on delivery / Card
Governorate	
From / To (date and time)	**Egypt (Cairo) time**, exact to the minute. "To" includes that whole minute. Choose both a date and a time.

Choose **Apply filters**; **Clear filters** resets them (the tab included).

8.5.1 Status tabs

Above the filters, tabs group the stages. Each tab shows how many orders it holds **with the other filters applied**. Switching tabs keeps your search, dates, payment and other filters; only the stage filter resets, and it then offers only that tab's stages.

Tab	Stages in it
All orders	Every stage
New	New, New – awaiting card payment
In progress	Confirmed, Preparing
Ready for delivery	Prepared
Delivered	Delivered
Cancelled / Returned	Cancelled, Returned, Expired (each keeps its own badge; use the stage filter to see only one)

The **Excel export uses the open tab** together with all the other applied filters (8.8).

8.5.2 Actions from the list

Admins who can change orders (super admin, store manager, order manager) see an **Actions** column:

- **The next step button** (for example **Confirm order**, **Start preparing**, **Mark as prepared**, **Mark as delivered**) moves the order to its normal next stage after a simple confirmation. No note is needed.
- **Other actions** ▾ opens a short menu with **Cancel order**, **Mark as returned** and **Move to "…"** (stage corrections). Each asks for a **required note**, which is saved in the order timeline and the audit log with your name and the time.
- Only the actions the system allows for that order and your role are shown; final orders show "—".
- After a change, the list refreshes with the same tab, filters and page, and the tab counts update. If the order changed meanwhile, nothing is done and the list shows its current state.

The **order page** keeps everything else: full details, payment, timeline, recording cash on delivery and the internal note.

[Screenshot S-33] Orders list with tabs and the Actions column · **[Screenshot S-34]** "Other actions" menu open.

Example: all *Prepared* cash orders *not paid yet*, placed between 1 Nov 09:00 and 10 Nov 18:30: Status = Prepared, Payment status = Not paid, Payment method = Cash on delivery, From = 01/11/2026 09:00, To = 10/11/2026 18:30.

[Screenshot S-17] Orders list with filters (desktop) · **[Screenshot S-18]** Orders list on a phone (cards).

8.6 Cash on delivery

- After a cash order is **Delivered**, use **Record cash as collected**. This marks it **Paid** and can be done **once**.
- Who: super admin, store manager and order manager.

8.7 Internal note

A free-text note for the team on each order, never shown to the customer (`orders.manage`).

8.8 Excel export

- **Export Excel** downloads **every order matching the open tab and all applied filters** (stage, payment status, payment method, governorate, date-and-time range, and the search by order number, customer name or phone), across all pages. The page on screen never limits it. Needs `orders.view` and `orders.export` : super admin, store manager and order manager (the order manager does **not** get payment management, reports or report exports).
- It uses what you **applied**: change a filter and choose **Apply filters** (or open another tab) before exporting; after **Clear filters** it exports all orders.
- The top of the sheet lists the tab and filters used and the number of orders exported; then one row per order, oldest first, with the stage names shown in the dashboard.
- If **no order matches**, nothing is downloaded and the page says so.
- File name: the tab or stage, the date-and-time range if any, and the export date, for example `jovie-orders_ready-for-delivery_exported-2026-11-12.xlsx` .
- It never includes emails, phone numbers, addresses, notes or card data. Arabic files are in Arabic and read right to left.
- Every download is recorded in the **audit log** ("Orders exported to Excel"): who, when, the file name, the filters used and the number of orders.

9. Sales and reports

Who: super admin, store manager. · `/admin/reports`

Four tabs: **Sales & revenue**, **Orders**, **Products**, **Inventory**. The figures are calculated by the server from saved orders, payments and stock history. **Nothing here changes any data.**

- **Order value is not money received.** The Sales tab shows collected money and outstanding amounts separately.
- **Test payments** (test mode) are kept apart.
- Each report can be exported as **CSV** or **Excel**. Excel files are in the chosen language; the Arabic ones read right to left.

[Screenshot S-19] Sales report · **[Screenshot S-20]** Export buttons.

10. Contact messages

Who: read: super admin, content manager, content editor, support. Change status: super admin, content manager, support. · `/admin/contact-messages`

- Messages sent through the Contact Us forms of the Octogenix and Jovie sites.
- Statuses: **New, Read, In progress, Replied, Resolved, Spam, Archived**.
- **Reply by email** opens your own email program with the address and subject filled in. The dashboard does not send the reply itself. Afterwards, choose **Mark as replied**.
- Admins who can read messages get a **notification** for each new message.

[Screenshot S-21] Messages list · **[Screenshot S-22]** One message.

11. Reviews

Who: super admin, store manager, product manager, content manager, content editor. · `/admin/reviews`

- New reviews wait as **Pending**. **Only approved reviews** appear in the store and count in the rating.
- Actions: **Approve**, **Hide from the store** (removes an approved review from the store) and **Reject**. **Rejected is final.**
- The review text is never changed in the dashboard.

[Screenshot S-23] Reviews list · **[Screenshot S-24]** One review.

12. Customers

Who: super admin, store manager, order manager, support. · `/admin/customers`

- Customer accounts, newest first. Open a customer to see their addresses and orders. **View only.**
- Guest orders (checkout without an account) appear in Orders, not here.

[Screenshot S-25] Customer details.

13. Shipping and store settings

`/admin/settings`

13.1 Shipping (super admin, store manager)

- One row per governorate: **shipping fee** (EGP; 0 = free) and **delivery on/off**.
- Delivery cannot be turned on where no fee is set.
- Changes apply to **new orders only**.

13.2 Store settings (super admin only)

Setting	Meaning
Store open for orders	Turns checkout on or off
Cash on delivery	Allows cash on delivery
Cash-on-delivery fee	Added to cash orders
Card payments	Allows paying by card
Free shipping from	Items total from which shipping is free
Time to finish a card payment	After this, an unpaid card order expires and its stock is released

Every change is confirmed before it is saved. Some values are **set on the server** and only shown for information.

[Screenshot S-26] Shipping · **[Screenshot S-27]** Store settings.

14. Corporate website

Who: super admin, content manager, content editor (permission `content.manage`). · `/admin/website`

This section manages what the **Octogenix corporate website** shows: the brands, the services, the company contact details and the agreed page texts and images. Saved changes appear on the website **at once**; no developer or new release is needed. The website's layout and design never change from here. Four tabs: **Our Brands**, **Services**, **Company information**, **Page content**.

14.1 Our Brands

- The list shows every brand **in website order**, with its logo, English and Arabic name, address name, and a **Published** or **Hidden** badge. Only published brands appear on the website.
- ↑ **/** ↓ change the order (saved at once, shown on the website). Clear the search first.
- **Publish / Hide** asks for confirmation. A hidden brand stays in the list and can be published again.
- **Delete** asks for confirmation and is offered only for brands **without Jovie store products**. A brand with store products (Jovie) can only be hidden. A deleted brand's address name can never be reused.
- **Add brand** / **Edit** opens the form:
  - **Address name** (for example `nova-pharma`): lower-case letters, numbers and hyphens.
  - **Brand name**, **small label**, **short description** (on the card), **full description**, **image description** and **link text**, each in English and Arabic.
  - **Logo**, **card image** and **image on hover**: JPEG, PNG or WebP up to 5 MB, with a preview. The card shows the card image (or the logo) and the hover image when the pointer is over it.
  - **Link on the card**: no link, a page of this website (for example `/contact`) or the brand's website (a full `https://` address).

    - **Has an online store**: shows a "Visit store" button; only Jovie has a store on this website.
    - **Published on the website**.
- **To publish a brand** it needs both names, both short descriptions and a logo or image; otherwise the save is refused and the missing fields are highlighted.
- The **Jovie store catalogue** (products, prices, stock) stays in **Products** and **Inventory**; this page only manages how Jovie appears in "Our Brands".

Example: adding a new brand. Add brand → address name `nova-pharma`, names "Nova Pharma" / «نوفا فارما», short descriptions in both languages, upload the logo, link "Brand website" `https://nova.example.com`, tick **Published** → Save. Nova Pharma appears in "Our Brands" at the end of the list; move it with ↑ if needed.

[Screenshot S-35] Our Brands list · **[Screenshot S-36]** Brand form.

14.2 Services

- Two tabs, **Customers** and **Suppliers**, as on the website. Each shows its services in website order.
- ↑ **/** ↓, **Publish / Hide** (with confirmation), **Delete** (with confirmation), **Add service** (starts in the open tab) and **Edit** work like brands.
- The form: tab, **title** and **description** in English and Arabic (required), **image** and **image on hover** (optional). When a service has an image, its **image description** is required in both languages.

[Screenshot S-37] Services (Customers tab).

14.3 Company information

- **Phone numbers** (international format such as `+201012345678`; add or remove; shown in this order) and **email address**. They appear in the website **footer** and the **Contact** section.
- **Social media**: Facebook, Instagram and LinkedIn addresses (`https://` only). Each appears as an icon in the website footer **only when it is filled in**; empty ones show nothing.
- **Company address** and **footer line**, in English and Arabic.
- Each part has its own **Save** button. If another admin changed these details meanwhile, nothing is saved and the page shows the current values.

[Screenshot S-38] Company information.

14.4 Page content

- Choose a **page section** (for example "Home: top section", "About: introduction", "Contact section", "Browser tab titles"). Its **texts** appear with an English and an Arabic field; its **images** with a preview and an upload button.
- **Save changes (n)** saves only what you changed in that section; **Discard changes** puts the saved values back.
- Some sections also have a **list**: top section slides, core values, company values and leadership. Each item can be edited and saved, published or hidden (with confirmation), moved with ↑ / ↓ and deleted (with confirmation). **New items start hidden**; publish them when ready. Each list has a minimum and maximum number of items.
- Only the texts and images that were **agreed to be editable** are here: it is not a page builder, and sections cannot be added or removed.

[Screenshot S-39] Page content with a section open.

14.5 Publishing, order and safety

	Brands	Services	List items
Hidden from the website when	Hidden (unpublished)	Hidden (unpublished)	Hidden
New ones start	As you choose	As you choose	Hidden
Order	↑ / ↓ in the list	↑ / ↓ within the tab	↑ / ↓ within the list
Delete	Only without store products	Yes, with confirmation	Yes, within the list minimum

- If someone else changed a brand, service or the company details after you opened them, **nothing is saved**; the page shows the current values.
- Every change is recorded in the **audit log** under **Corporate website**, with the admin, the time and before/after values (including image changes).

14.6 Who can do what

Action	Super admin	Content manager	Content editor	Other roles
Open the Corporate website section	✅	✅	✅	—
Add, edit, publish, hide, order, delete brands and services	✅	✅	✅	—
Edit company contact details, social links, address	✅	✅	✅	—
Edit page texts, images and lists	✅	✅	✅	—
Store settings (checkout switches and amounts)	✅	—	—	—

15. Admin users (super admins only)

`/admin/users`

15.1 What you can do

- List admins, search by name or email, filter by role or status, sort.
- **Create** an account, **change** name, email, role or language, **deactivate** or **reactivate**.
- You **cannot** see or set anyone's password. You cannot change your own role, and you cannot remove the last active super admin.

15.2 Creating an account: steps

1. Go to **Admin users** and choose **Add admin**.
2. Enter **Name**, **Email** (work email, must be unique), **Role** and **Language** (English/Arabic).
3. Check the line under the role: **"Sections this role can use: ..."**.
4. Choose **Create account**.
5. Read the message:

- "*…an invitation email was queued*": the person receives a link (valid 60 minutes) to choose their own password.
- "*…email is not delivered in this environment…*": see 14.3.

Examples (sample names and addresses; use real work emails):

Person	Email	Role	They will be able to…
Mona, online store lead	`mona@example.com`	Store manager	Run products, stock, orders, payments, reports, shipping, reviews
Karim, catalogue	`karim@example.com`	Product manager	Edit products and discounts, adjust stock, moderate reviews
Sara, orders desk	`sara@example.com`	Order manager	Move orders through the stages, export orders to Excel, record cash on delivery, view customers
Nour, customer care	`nour@example.com`	Content manager	Manage the corporate website, handle contact messages, moderate reviews
Omar, website texts	`omar@example.com`	Content editor	Manage the corporate website, read contact messages, moderate reviews
Hana, call centre	`hana@example.com`	Support	Handle contact messages, look up orders and customers (view only)

[Screenshot S-28] Admin users list · **[Screenshot S-29]** Add admin form with the role line · **[Screenshot S-30]** "Email not delivered" message after creating an account.

15.3 Invitations: the current email limitation

- In this environment the mail setting is **"log"**: emails are written to the server log and **not sent**.
- The dashboard says this clearly after you create an account: **no invitation reaches the new admin**, so **they cannot set a password until a real mail service is set up.**
- The dashboard never shows invitation links or reset links, and they must not be shared in chat or email.
- **What to do now:** create the account (it is ready), and once email delivery is configured on the server, the person can use **Forgot your password?** on the sign-in page to get a link.

15.4 Deactivating

Choose **Deactivate** and confirm. The admin is signed out at once and cannot use the dashboard until reactivated. Their history stays in the audit log.

16. Audit log and notifications

16.1 Audit log (super admins only) · `/admin/audit-log`

- Every change made by an admin, newest first: **who**, **when**, **what** (before → after) and the **reason** where one was given.
- Areas: products, inventory, orders, shipping, store settings, reviews, admin accounts, discounts and promo codes, contact messages, corporate website.
- Entries **cannot be edited or deleted**.

16.2 Notifications (everyone) · bell icon

Notification	Who receives it
New order	Admins who can see orders
Low stock / out of stock	Admins who manage inventory
New review waiting	Admins who manage reviews
New contact message	Admins who can read messages

Open a notification to go to the record; **Mark all as read** clears the counter.

[Screenshot S-31] Audit log · **[Screenshot S-32]** Notifications.

17. Screens to capture

Use a **test admin account and test data only**: no real customer names, phones, emails or addresses. Capture at a desktop width (about 1440 px) unless the item says "phone" (about 390 px). Save as PNG named after the ID, for example `S-13.png`, in `docs/admin-manual/screenshots/`.

ID	Screen	Language
S-01	Sign-in page	EN
S-02	Dashboard with left menu	EN
S-03	Dashboard with left menu	AR
S-04	Overview	EN

18. Messages you may see and what to do

Message	Meaning	What to do
This order changed meanwhile… (or the same for other records)	Someone else or the system changed it after you opened it	Review the current version shown and try again
Add a note explaining this change: it is not the normal next step.	You made a stage correction without a note	Write why, then confirm
Please give a reason.	Cancelling or a correction needs a reason	Write the reason
You do not have access to this section page	Your role cannot use this page	Ask a super admin if you need access
Too many attempts. Please wait a minute and try again.	Sign-in or reset requested too often	Wait a minute
That did not work. with details	The server refused the change; details explain why	Follow the details, or ask a super admin
Sent back to the sign-in page	Your session ended or your account was deactivated	Sign in again; if that fails, contact a super admin
